RASHMI

Computer Science (AI & Machine Learning) | Data Analytics | Full Stack Development

Kundapura, Karnataka, India • +91 8296979850 • rashmishriyann@gmail.com

PROFESSIONAL SUMMARY

Motivated Computer Science and Engineering student specialising in Artificial Intelligence, Machine Learning, and Full Stack Development. Hands-on internship experience in data analytics, AI/ML workflows, and full-stack web development. Proficient in Python, SQL, Excel, and modern web technologies, with project experience in customer segmentation, ML problem framing, responsible AI documentation, and end-to-end application development. Seeking an entry-level opportunity in data analytics, machine learning, or full-stack development.

EDUCATION

AJ Institute of Engineering and Technology — Expected 2028
Bachelor of Engineering, Computer Science and Engineering (AI & ML)

R N Shetty PU College — 2023 – 2024
Pre-University Course (PUC)

Government High School, Heskuthur — 2021 – 2022
Secondary School Leaving Certificate (SSLC)

INTERNSHIP EXPERIENCE

Full Stack Development Intern | Workora — Oct 2026 – Present

- Developed multiple full-stack features including a Live Query Filter System, JWT-based authentication, and Team Availability Tracker.
- Built RESTful APIs, integrated databases, and created responsive UI components for production-ready applications.
- Collaborated in an agile environment to deliver features, debug issues, and improve application performance.

Data Analyst Intern | Thiranex — 12 Aug 2026 – 11 Sep 2026

- Cleaned, explored, and analysed datasets to identify patterns, trends, and actionable insights.
- Communicated findings clearly to stakeholders to support data-driven decision-making.

Artificial Intelligence Intern | Rabtech Academy — 5 Sep 2026 – 5 Oct 2026

- Developed practical understanding of AI and machine learning workflows through guided, hands-on projects.
- Applied machine learning techniques to real-world problem statements and evaluated model performance.

PROJECTS

Live Query Filter System

- Built a real-time query and filtering system that enables dynamic search and data retrieval across large datasets with low latency.

User Authentication & JWT

- Designed and implemented secure authentication using JWT, including login, token refresh, protected routes, and session management.

Team Availability Tracker

- Developed a full-stack tracker to monitor team member availability, schedules, and resource allocation in real time.

Customer Segmentation & ML Problem Framing

- Segmented customers by behaviour for targeted decisions and framed business needs as well-defined ML problems with clear evaluation criteria.

SKILLS

Technical: Python, SQL, Machine Learning, Excel, Data Analysis, HTML/CSS, JavaScript, Full Stack Development

Core Competencies: Customer Segmentation, ML Problem Framing, Responsible AI, Web Application Development

Professional: Communication, Teamwork, Leadership, Problem Solving
